

SamP-330

(Patch list)

Using the powerful engine of the sampler "TAL-Sampler" from Togu Audio Line (<https://www.tal-software.com/products/tal-sampler>) a huge, exciting and playable library that recreates the feeling of one of the most famous string machines of all time: the Roland VP-330.

The library offers few presets, simply because they cannot be considered "presets": each one of them maps a specific configuration of the original machine and is ready to be used to match your needs.

Considering the panel of the original instruments:

these are the available mappings.

VP330OnlyStrings

The VP-330 set to use only the “strings” sound both on the upper part and on the lower part.

VP330StringsFemaleMale4

The VP-330 set to use the “strings” sound and the “female” sound on the upper part, and the “male 4” sound on the lower part.

VP330StringsFemaleMale8

The VP-330 set to use the “strings” sound and the “female” sound on the upper part, and the “male 8” sound on the lower part.

VP330StringsFemaleMale48
